I am a Full Stack Software Developer with experience in building full stack web applications, and I am a graduate from West Virginia University with a Bachelor's Degree in Computer Engineering. From college I joined Revature where I extended my knowledge from Java to full stack programming using Spring/Angular, and am now looking for opportunities elsewhere. I am skilled in both Java and .NET technology stacks, and am always picking up new technologies to learn.

Professional Experience

Full Stack Software Developer   Revature | March 2022 - October 2022
- Trained in all areas to learn how to create full stack web applications
- Created demo projects within an agile team to apply knowledge of full stack applications
